

# Public Open House

**Wednesday, September 22 from 5-7 p.m.**

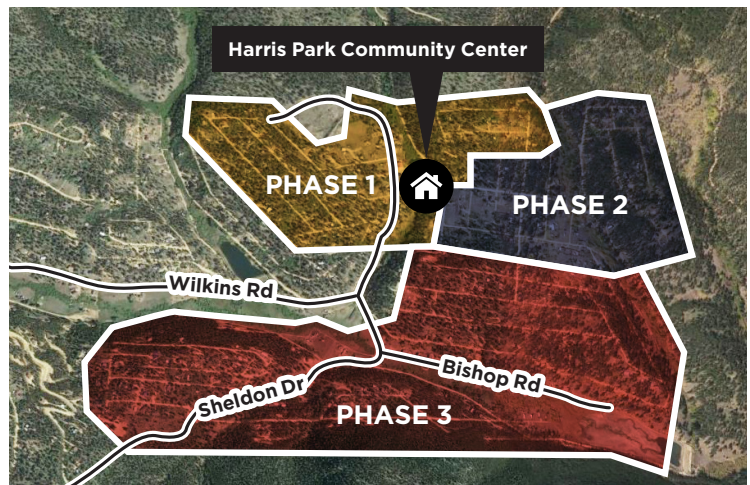

Harris Park Community Center, 2154 Shelton Dr, Bailey, CO 80421

CORE Electric Cooperative (CORE), formerly IREA, will be rebuilding existing distribution lines and replacing equipment/poles. These changes will improve the reliability to our infrastructure and bring this portion of our service territory up to our current design standards and code requirements.

**As part of this project, contractors for CORE will be conducting data gathering, facility inventorying, utility locating, and construction staking that may require access on private property.**

Join us at our public open house to learn more about this project and to speak with the project team.

**For more information, email [Chrissy.Breit@hdrinc.com](mailto:Chrissy.Breit@hdrinc.com) or call 303-524-8467**

**The Harris Park Rebuild has been divided geographically into three phases:**

**PHASE 1** — Construction staking and utility locating is anticipated for for October 2021.

**PHASE 2** and **PHASE 3** — Initial data gathering and facility inventorying is anticipated for October 2021.
