

Franktown Transmission Line Rebuild

Important Project Information

Overview

The rebuild of approximately 4.8 miles of existing transmission line from the Franktown Substation to the Castle Rock Substation will improve reliability, bring facilities up to CORE's latest standards and balance power loads in the area.

Timeline

Design activities have commenced on the project and will last through 2022 and into 2023. Construction is scheduled to begin Spring or Summer 2023.

Design

Residents may see survey crews, engineers and/or aerial crews in the area collecting data necessary for the project.

Third Parties

CORE has contracted with [Burns & McDonnell](#) for engineering and land services.

Route

The rebuilt line will follow the general alignment of the existing line. Our consultant, Burns & McDonnell, will be in the area surveying for pole placement.
