## Learn more about planned distribution line work in your neighborhood

CORE Electric Cooperative plans to rebuild existing distribution lines and replace equipment/poles in your area. These changes will improve service reliability and bring this part of our infrastructure up to current design standards and code requirements.

**Contractors for CORE will conduct data gathering, facility inventorying, utility locating and construction staking that might require access to private property.**

We invite you to attend our public open house event Wednesday, Oct. 23, to learn more about the project and speak directly with members of the project team.

**Public Open House 5 to 7 p.m. Wednesday, Oct. 23**  
Harris Park Community Center, 2154 Shelton Dr, Bailey, CO

**PHASE 1**  
**PHASE 2**

The work is completed and the lines are energized.

**PHASE 3**

Construction staking and utility locating is anticipated for Spring 2025.

**PHASE 4**

Initial data gathering and facility inventorying is anticipated for Fall 2024.

Rebuild work is being completed in different geographic phases.
